

## Medtronic and Bayer HealthCare Expand International Alliance

MINNEAPOLIS & TARRYTOWN, N.Y., May 09, 2011 (BUSINESS WIRE) --

Medtronic, Inc. (NYSE: MDT) and Bayer HealthCare have expanded their international alliance to now include the United States and will work exclusively to develop innovative next generation diabetes management solutions for patients, state-of-the-art, wireless blood glucose meters worldwide.

Since 2007, the two companies have successfully collaborated internationally in over 20 countries by providing Bayer's CONTOUR(R) Link meter to people with diabetes who use compatible MiniMed Paradigm(R) insulin pumps and the Guardian(R) REAL-Time continuous glucose monitoring (CGM) system from Medtronic.

"Our goal is to improve patient outcomes while delivering an exceptional customer experience," said Katie Szyman, president of the Diabetes business and senior vice president at Medtronic. "We are excited to work with Bayer to develop and deliver future integrated solutions that are even smaller and easier to use, with accuracy that surpasses today's standards in diabetes management."

"With Medtronic's industry-leading insulin pump technology and our advanced blood glucose meter and strip technology, we believe we can provide people with diabetes a convenient solution for better glucose control," said Alan Main, president of Bayer Medical Care. "With a strong history of innovation similar to Bayer's, Medtronic is an ideal collaborator with whom we can share complementary technologies, resources and talent to support patients and simplify their diabetes care."

### About Bayer HealthCare

The Bayer Group is a global enterprise with core competencies in the fields of healthcare, nutrition and high-tech materials. Bayer HealthCare, a subgroup of Bayer AG, is one of the world's leading, innovative companies in the healthcare and medical products industry. The company combines the global activities of the Animal Health, Consumer Care, Medical Care and Pharmaceuticals divisions. Bayer HealthCare's aim is to discover and manufacture products that will improve human and animal health by diagnosing, preventing and treating disease.
