

## Medtronic Announces 2014 "Global Heroes" Team

*Distance Runners from Around the World Who Benefit from Medical Technology to Run Medtronic Twin Cities Marathon Events this Fall*

MINNEAPOLIS - August 11, 2014 - Twenty-five long-distance runners who benefit from medical technology will be honored as "Medtronic Global Heroes" when they run as a team in the Medtronic Twin Cities Marathon or TC 10 Mile on Sunday, October 5, 2014.

This year's team includes runners from 10 different countries: Australia, Brazil, Canada, China, Colombia, Israel, Italy, Switzerland, United Kingdom and the United States. Each runner has a medical device to treat conditions such as heart disease, diabetes, spinal disorders, chronic pain or neurological disorders. The Medtronic Global Heroes program, launched in 2006, celebrates people who have overcome chronic disease conditions and continue to demonstrate a passion for running.

"Through their running and service, the Global Heroes represent fully empowered patients who not only actively manage their own health needs, but are also proactively contributing to the well-being of their families, friends and communities," says Dr. Jacob Gayle, vice president, Medtronic Philanthropy.

Global Heroes are selected by Twin Cities In Motion, the non-profit organization that directs the Medtronic Twin Cities Marathon. Each participant and their guest are awarded a race entry and travel expenses to Minnesota.

Additional information about the Medtronic Global Heroes team members can be found at [www.medtronic.com/globalheroes](http://www.medtronic.com/globalheroes), or visit the Medtronic Global Heroes Facebook page.

The 2014 Medtronic Global Heroes are:

### Marathon Participants

Molly Dicroce, Arvada, Colorado

Dicroce has a spinal and bone fusion device to treat lumbar degenerative disc disease.

Jason Dunn, Smithville, Missouri

Dunn has a stent to treat coronary artery disease.

Gillian Forsyth, Chicago, Illinois

Forsyth has an insulin pump to manage Type 1 diabetes.

Kent Grelling, Orinda, California

Grelling has an artificial heart valve and a conduit to treat a congenital bicuspid aorta and ascending aortic aneurysm.

Lynn Hall, Lafayette, Colorado

Hall has a neurostimulator to manage pain.
