Medtronic, a global leader in healthcare technology, is proud to announce that it has been honored with the 2025 MedTech Breakthrough Award for 'Best Overall Medical Device Solution' for its HealthCast™ intelligent patient monitoring solution. This award recognizes the company's commitment to empowering clinicians to provide exceptional patient care through groundbreaking technology and insights.

MedTech Breakthrough is an independent market intelligence organization that recognizes the top companies, technologies, and products in the global health and medical technology market. This year, the HealthCast™ intelligent patient monitoring solution from Medtronic stood out for its approach to advancing the status quo of patient monitoring and simplifying patient management^{1,2}.

An offering of the Acute Care & Monitoring business of Medtronic, HealthCast™ intelligent patient monitoring is a portfolio of connectivity, interoperability, and remote monitoring solutions. By addressing the limitations of intermittent spot checks, HealthCast™ aims to provide continuous monitoring that may help in the early detection of physiologic decline³, potentially aiding in the reduction of unplanned ICU admissions and supporting improved patient outcomes⁴. The use of continuous multi-parameter monitoring has been associated with positive clinical outcomes, such as decreased mortality⁵ and reduced hospital length of stay⁶. The HealthCast™ portfolio supports healthcare professionals with the tools necessary to make informed clinical decisions, enhancing patient care from hospital to home⁷.

The HealthCast™ portfolio includes:

- HealthCast™ wearables: Extend patient monitoring in hospital and home settings by empowering clinical teams to get ahead of patient decline with valuable insights and automated, personalized trending

notifications to support proactive decision-making and support patient discharge decisions⁸. [Learn more about BioButton®* multi-parameter wearable.](#) ††

- [HealthCast™ remote monitoring](#): Remotely monitor patients providing continuous, near real-time data, insights, and alarms so staff can visualize patient data, respond quickly, and connect data with the EMR. [Learn more about Vital Sync™ remote patient monitoring.](#)
- [HealthCast™ services](#): Providing tailored support, including assistance for delivery, device EMR connectivity, technical training, connection service plans, and customer success. [Learn more about HealthCast™ services.](#)

"We are incredibly honored to receive the MedTech Breakthrough Award for HealthCast™ intelligent patient monitoring," said Jason Case, vice president research and development for the Acute Care & Monitoring business, which is part of the Medical Surgical Portfolio at Medtronic. "This recognition highlights our dedication to innovation and our commitment to empowering clinicians with technologies to enhance the quality of care for their patients. HealthCast™ intelligent patient monitoring reflects the Acute Care & Monitoring business's focus on empowering healthcare professionals with world-class technology to personalize patient care, anytime, anywhere."

As part of its mission, Medtronic is committed to reducing disparities in outcomes, expanding access, and helping to protect more patients in more places.

About Medtronic

Bold thinking. Bolder actions. We are Medtronic. Medtronic plc, headquartered in Galway, Ireland, is the leading global healthcare technology company that boldly attacks the most challenging health problems facing humanity by searching out and finding solutions. Our Mission – to alleviate pain, restore health, and extend life – unites a global team of 95,000+ passionate people across more than 150 countries. Our technologies and therapies treat 70 health conditions and include cardiac devices, surgical robotics, insulin pumps, surgical tools, patient monitoring systems, and more. Powered by our diverse knowledge, insatiable curiosity, and desire to help all those who need it, we deliver innovative technologies that transform the lives of two people every second, every hour, every day. Expect more from us as we empower insight-driven care, experiences that put people first, and better outcomes for our world. In everything we do, we are engineering the extraordinary.
