Our dedication to transforming lives starts here

Better outcomes for our world

Life-transforming technologies

Experiences that put people first

Insight-driven care

Value-based healthcare

- With value-based healthcare, advances in technology help deliver benefits for health systems and patients alike, with shared accountability for costs and outcomes.

- Value-based healthcare puts a premium on quality over quantity, shifting away from fee-for-services toward fee-for-value.

Integrated health solutions

We partner with hospital management and medical leaders to transform care pathways and clinical operations, with a shared goal of:

- Improving efficiency and outcomes
- Increasing patient and staff satisfaction
- Optimizing cost

With our extensive experience across and within regions, we provide proven and highly effective solutions. Solutions that can be quickly tailored to providers' specific needs, generating value now – and for the future.

Positive impact on complex and challenging conditions

70+
conditions in the human body treated with our therapies

2
people every second have their lives improved – and counting

Public-private partnerships

Increasing patient access in multiple communities aligns with the core of our Mission. These public-private partnerships – with outcome-oriented business models – create mutual benefits by making the most of our skills, expertise, and assets through the appropriate transfer of risk. They accelerate innovation-driven growth and actively contribute to the international push for universal health coverage. With jointly defined objectives, they address health system challenges efficiently, and in particular provide a route to bring our technologies to emerging markets, raising quality and delivering improved outcomes.
